

ELECTRIC, GAS *and* COMBINATION LIGHTING FIXTURES

Table Lamps - Floor Lamps - Electrical Wiring Material - Lighting Glassware

Sears, Roebuck and Co.
CHICAGO

Please Read Carefully These Explanations and Instructions

Arrangement of Prices

For your convenience we have given three sets of prices on the majority of our fixtures, namely: (1) *fixtures bare*; (2) *fixtures complete but without glassware*; (3) *fixtures complete as shown with glassware*. These terms as applied to gas, electric and combination fixtures mean as follows:

Bare

Electric Fixtures. This means the bare fixture fitted with ceiling crowfoot but not wired, and without sockets, shade rings or glassware.

Gas Fixtures. This means the bare fixture with ceiling coupling (stiff joint) but without shade rings, gas burners or glassware. If the gas fixture is shown with candles instead of glass shades, then the bare fixture is without the brass candle cups, white opal glass candles and bobaches, brass candle pillars or tips.

Combination Fixtures. This means the bare fixture fitted with iron top finisher but not wired and without insulating joint, sockets, shade rings, gas burners or glassware. If the combination fixture is shown with gas candles instead of gas shades, then the bare fixture is without the brass candle cups, white opal glass candles and bobaches, brass candle pillars or tips.

Complete, Without Glassware

Electric Fixtures. This means the fixture equipped with ceiling crowfoot and completely wired throughout, including standard Bryant "New Wrinkle" sockets, with all body wires, arm wires and sockets connected, soldered and taped according to the approved requirements of the National Board of Underwriters. The fixture is also fitted with brass shade rings but the glassware shown in the illustration is not included.

Gas Fixtures. This means the fixture equipped with ceiling coupling (stiff joint), brass shade rings and burners but without the glassware shown in the illustration. If the gas fixture is shown with candles instead of glass shades then the complete fixture includes the brass candle cups, white opal glass candles and bobaches, brass candle pillars and tips.

Combination Fixtures. This means the fixture equipped with iron top finisher, insulating joint, gas burners and completely wired throughout, including standard Bryant "New Wrinkle" sockets, with all body wires, arm wires and sockets connected, soldered and taped according to the approved requirements of the National Board of Underwriters. The fixture is also fitted with brass shade rings but the glassware shown in the illustration is not included. If the combination fixture is shown with gas candles instead of gas shades then the complete fixture includes the brass candle cups, white opal glass candles and bobaches, brass candle pillars and tips.

Complete With Glassware

The electric, gas and combination fixtures priced complete with glassware are equipped exactly the same as the complete fixtures described immediately above and, in addition to this complete equipment, the price also includes the glassware shown in the illustration.

Electric lamps (bulbs) are not furnished or included in the price of any complete fixture unless it is specifically so stated in the description under the fixture.

Acetylene Gas Tips

We can equip all gas fixtures, except those with inverted burners, with acetylene gas tips at the additional cost of the acetylene burners listed in this catalog. Please select and specify burner wanted when ordering.

Glassware

In selecting the glassware for the complete fixtures we have endeavored to choose the design and shape that is adapted to that particular fixture. If you want to use different glassware from that shown in the illustration you can figure the cost of this change by turning to the pages of the catalog where the glassware is listed separately. To obtain the cost of the complete fixture with the new glassware, deduct the price of the glassware shown on the fixture from the cost of the complete fixture and add the cost of the glassware that you want. If you have any trouble in figuring this cost we will be glad to furnish you with a quotation on request.

Finishes

We quote the majority of our fixtures in *brush (satin) brass* finish. Where the ceiling canopy, stem or body is ornamented or embossed, this ornamentation or embossing is retouched with black in the hollows to bring out the high lights and richness of the ornamentation. *Brush (satin) brass* or *brush brass* and *black* are the most satisfactory and practical ways to finish brass fixtures in a great majority of patterns.

We also offer some of our finer fixtures in *Etruscan gold*, *silver* and *verde antique (green)*, where we think the fixture or style is particularly adapted to these finishes. We offer a complete line of fixtures for the bathroom finished in *polished nickel*; a complete line of fixtures for the kitchen in *oxidized copper*; a line of inexpensive gas, electric and combination chandeliers in *oxidized copper*; a complete line of outdoor and porch fixtures made of *iron in matte black finish*.

We believe that the selection of these special lines has been so complete and represents such a practical assortment that you will be able to find exactly what you want without resorting to the delay and inconvenience to you of ordering other patterns in special finishes. We can, however, furnish you the following finishes on fixtures (not on sundries) now listed in polished brass, brush (satin) brass and brush brass and black at an additional charge of 10 per cent added to the price quoted in the catalog:

*Oxidized copper, Statuary bronze,
Polished nickel, Verde antique (green).*

We will be glad to quote prices on any other finish desired. If the fixture is intended to match hardware or other trimmings, a sample of finish must be furnished.

We are prepared to make immediate shipment of all fixtures offered in the catalog in the finish in which they are listed, but all changes of finish or special finishes will take approximately three weeks to execute.

Length and Spread of Fixtures

The length of the fixture is determined by the distance from the top of the ceiling canopy to the extreme bottom point. When the glassware projects below the bottom point of the fixture then the length is measured to the bottom of the glassware. This determines the length even where the fixture is oriented bare or without glassware.

The spread of the fixture is the greatest distance between opposite burners on a gas fixture and from the tip of one electric light to the tip of the opposite electric light on an electric fixture. On a combination fixture the spread is the width between the tips of the electric lights. In determining the spread a two-light fixture is always taken as a standard of measurement.

The extension on brackets is the distance from the wall to the gas tip on the gas bracket and to the tip of the lamp on the electric bracket.

Shortening and Lengthening

For making fixtures shorter than the length stated in the catalog no extra charge or deduction from catalog price will be made.

Fixtures made longer than the length stated in the catalog will cost as follows, including the iron pipe and brass casing: on electric and combination fixtures it also includes wiring:

Standard Round Brass Casing, $\frac{1}{4}$, $\frac{3}{8}$, $\frac{1}{2}$ or 1 inch, including iron pipe (and wiring on electric and combination fixtures). Price, 25 cents a foot or fraction of a foot.

Square or Reeded Brass Casing, $\frac{1}{4}$, $\frac{3}{8}$ or 1 inch, including iron pipe (and wiring on electric and combination fixtures). Price, 30 cents a foot or fraction of a foot.

Round Link Solid Brass Chain (round rod). Price, 25 cents a foot or fraction of a foot for all sizes shown on fixtures, except for the extra heavy chain as shown on Nos. 34A5794, 34A5567, 34A5524, 34A5535, 34A5793, 34A5531, 34A5520, 34A5618, 34A5818 and all Etruscan gold and silver plated fixtures, for which add 50 cents a foot or fraction of a foot.

Round Link Solid Brass Chain (square rod). Price, per foot or fraction of a foot, 35 cents for size shown on fixtures.

Square Link Solid Brass Chain (square rod). Price, per foot or fraction of a foot, 45 cents for size shown on fixtures.

Chains on Domes. Price, 50 cents a foot or fraction of a foot.

Our chains are made of solid brass in brush (satin) brass finish except Nos. 34A8507 and 34A8560, which are made of steel and finished in brush (satin) brass and black, respectively.

Insulation

Insulating joints are included with combination fixtures in the complete wired price but are not included on electric fixtures. If wanted or required on electric fixtures, specify when ordering and allow cost of same. Prices for insulating joints are to be found in the back of catalog. If fiber insulators are wanted on ceiling or bracket canopies, state this on order and allow 10 cents for each 4 to 6-inch canopy and 2 cents for each additional inch in diameter on ceiling pans and canopies larger than 6 inches. The insurance underwriters require an insulating joint on all combination fixtures and on electric fixtures attached to a pipe.

House Wiring

We are in a position to furnish estimates on material for house wiring and solicit an opportunity to make quotations. Send us the blue prints or make a diagram of the floor plan of your house, giving the dimensions (size) of the rooms, heights of ceilings, and whether the house is under construction or already lathed and plastered. Also specify whether rigid or flexible conduit (piping) or knob and tube work is to be used for the wiring. Give us the total number of lights you will have and show on the blue print or diagram where the lights (ceiling lights, wall lights, etc.) are to go. If you want baseboard connections for portables, floor lamps, electric irons, etc., show where you want them to go. State which lights you wish operated by switches and whether push button or snap switches are preferred. Mark the place where the current (main wires) will enter the building.

If you give us this information our experts will go over your plans, make suggestions and send you an estimate of the amount and cost of material necessary to wire your house, ready to hang the fixtures.

Instructions for Ordering

When ordering lighting fixtures always give: (1) *Catalog number*. (2) *Name of article*, whether brackets, chandeliers, showers, etc. (3) *Style*—gas, electric or combination. (4) *Number of lights*. (5) *Whether bare, complete without glassware, or complete as shown with glassware*. (6) *Price*. (7) *If any change is desired in the fixture as shown*, such as lengthening, shortening, change of glassware, burners, etc., this change must be clearly stated. It is unnecessary to send us the picture of the fixture you order. Doing this gives us no information that is not already furnished us by the catalog number and the description you give.

Method of Shipment

Please state specifically whether you want your order shipped *by freight or express*. We always recommend freight shipment as the saving in transportation charges in use of freight over express is considerable.

We make no extra charge whatever for packing. You therefore know exactly what your fixtures will cost you, as the prices in the catalog include everything except the transportation charges.

Terms and How to Order

We require cash with orders (see paragraph below about "How to Send Money"), or we will ship C. O. D. (see paragraph below on "C. O. D. Shipments"). Use our regular fixture order blank if you have one. If not, use any piece of plain paper, but give us the information asked for. (See paragraph above on "Instructions for Ordering.") Always write your full name (Christian name and surname) and address very plainly. Give your postoffice, county and state. If you have a local address, such as rural route or street and number, or postoffice box number, be sure to give it. If your shipping point is different from your postoffice be sure to mention the shipping point as well as the postoffice.

How to Send Money

The best ways to send money are by postoffice money order, express money order, bank draft or cash by registered letter. If you have a checking account at a bank you may, if you prefer, send us your personal check.

C. O. D. Shipments

We have practically discontinued shipping goods C. O. D. because nearly all our customers who formerly had goods shipped this way now send cash in full with their orders, thus saving the annoyance of going to a bank or an express office to pay the balance due on the shipment, and also saving the cost of returning the money to us. Still, if for any reason a customer would prefer to see and examine goods before paying for them in full, we will make C. O. D. shipment on receipt of a sufficient deposit, usually about one-fourth of the amount of the order. We will not, however, accept any order to be shipped C. O. D. if it amounts to less than \$5.00, because orders for amounts smaller than this are unprofitable to the customer, due to the charge for collection and return of the money.

OUR GUARANTEE

Each and every lighting fixture and their parts you buy from us is sold with the understanding and agreement that **WE MUST SATISFY YOU PERFECTLY.** We guarantee that each and every article listed in this catalog is exactly as described and illustrated. If there is the slightest dissatisfaction because of quality, style, size or for any other reason whatever, we expect you to return the article to us at our expense and we will then exchange it for exactly what you want, or return your money, as you wish, including any

transportation charges you have paid. We also guarantee safe delivery of all of our fixtures and sundries and **WE DO NOT CHARGE EXTRA** for boxing or cartage. Our prices include delivery of the merchandise on board the freight or express cars in Chicago, securely and safely boxed. You pay the transportation charges from Chicago to your station. We not only guarantee safe delivery of all our lighting fixtures, parts and glassware, but **WE WILL MAKE GOOD ANY BREAKAGE OR DAMAGE IN TRANSIT WITHOUT CHARGE.**

REGARDING THE QUALITY OF OUR FIXTURES

There are no better made fixtures than those listed in this catalog. They are manufactured by the highest grade workmen in America. No detail in even the cheapest fixture has been slighted. They are made of genuine brass and all of the castings, tubings, canopies, and other features are constructed of extra heavy gauge (weight) metal. We use heavier gauge brass than is customary, in order to insure durability. In thoroughness of construction they are absolutely perfect. All connecting joints and threads are inspected,

insuring accuracy of fit. They conform in every particular with the requirements of the Board of Fire Insurance Underwriters and all the material we supply is approved by this Board. For example, we use "New Code" insulated wire and "New Wrinkle" Association (licensed) sockets. The finish on our fixtures is the very best. This means that any fixture you order, whether it is polished brass, brush brass, brass or black or any other finish, will be equal, if not superior, to any fixture that is made, irrespective of cost.

HOW OUR WIRED FIXTURES SAVE YOU TIME AND MONEY

We ship our "wired electric and combination fixtures" *completely assembled and wired. All ready to erect.* By this we mean that in all the completely wired electric and combination fixtures the sockets are attached to the arms and connected with the arm wires. The arms are fitted into the body and the arm wires connected to the body wires with all the connections taped and insulated according to the rules of the Board of Underwriters. The fixture reaches you *complete in one piece*, and all you have to do is unpack your fixture, attach it to the wall or

ceiling and connect the two wires at the end of the fixture stem to your house wires. We recommend that you have your local electrician put up your fixture as he is an expert in this line. If for any reason you are unable to get an electrician or do not wish to employ an electrician, you can without any previous experience, erect our fixtures in a very few minutes without special tools and without instructions.

Our wired fixtures should appeal strongly, not only to the actual user but also to the electrical supply dealer and local electrician who

makes a business of selling fixtures, because our wiring is done by the most expert workmen insuring a perfect job in every case, and our prices so low that the dealer can buy our wired fixtures and still sell them cheaper than if he did the wiring himself. We were the first fixture dealers to attempt the innovation of shipping wired fixtures absolutely complete in one piece ready to erect. And the rapid growth of our business in this line proves that we are on the right track.

Buy our wired fixtures and save time and money.

Electric Candelabra Chandeliers

Dutch Period Electric Candle Fixture

Made of genuine brass in brush (satin) brass black finish. Length to bottom of fixture, 36 inches. Spread, 16 inches. Cast ceiling canopy, 6 inches in diameter, beautifully chased in festoon design, with solid brass round link chain supporting an artistic taper body, 7 inches in diameter and 11 inches in length. The edge of the body has a cast brass beading and the lower part is beautifully decorated with cast brass ornament. From the top of this body extend four curved flat reeded arms with spun brass candle plates, candle holders and white enameled metal candles (1 1/4 inches in diameter). The candles are fitted with Edison base keyless sockets inside of candles and round 2 1/2-inch frosted 16-candle power electric lamp.

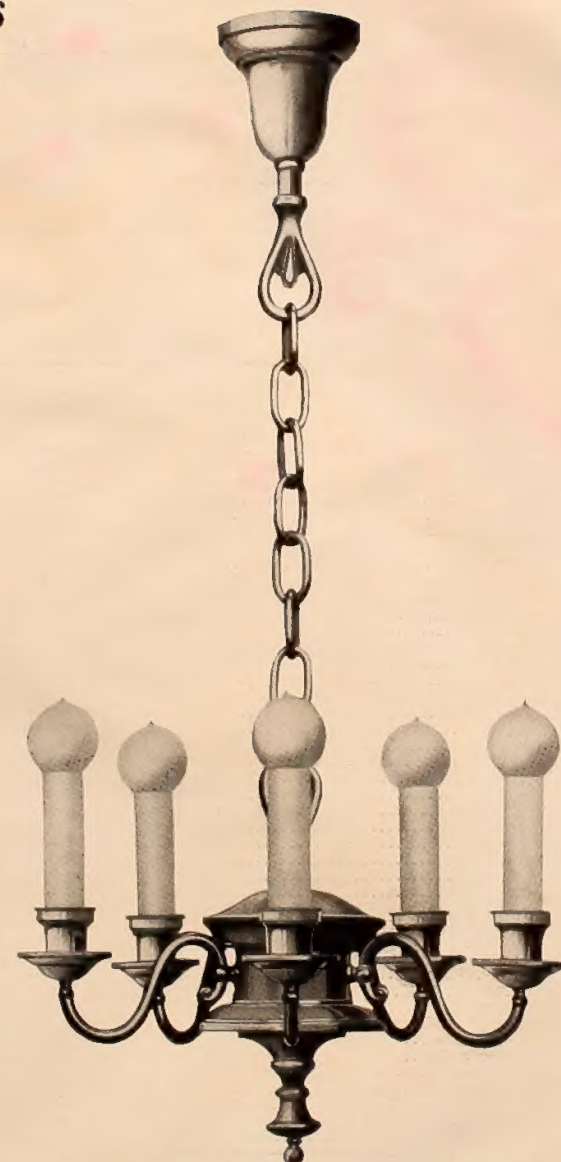

Catalog No.	Style	Complete as Shown, Wired
34A5552	4-Light	\$17.98

Silver Plated Electric Candle Fixture

This Colonial design chandelier is made of genuine brass, silver plated. Length to bottom of fixture, 36 inches. Spread, 20 inches. Spun ceiling canopy, 6 1/2 inches in diameter, from which extends a massive round link chain supporting an artistic body, 12 inches long and 4 inches wide, terminating in a knob at bottom. From the upper part of the body extend five gracefully curved oval arms, 3/4 inch in diameter, with candle plates, candle holders and white enameled metal candles (1 1/4 inches in diameter). The candles are fitted with Edison base keyless sockets inside of candles and round 2 1/2-inch frosted 16-candle power electric lamps.

Electric Candelabra Chandeliers

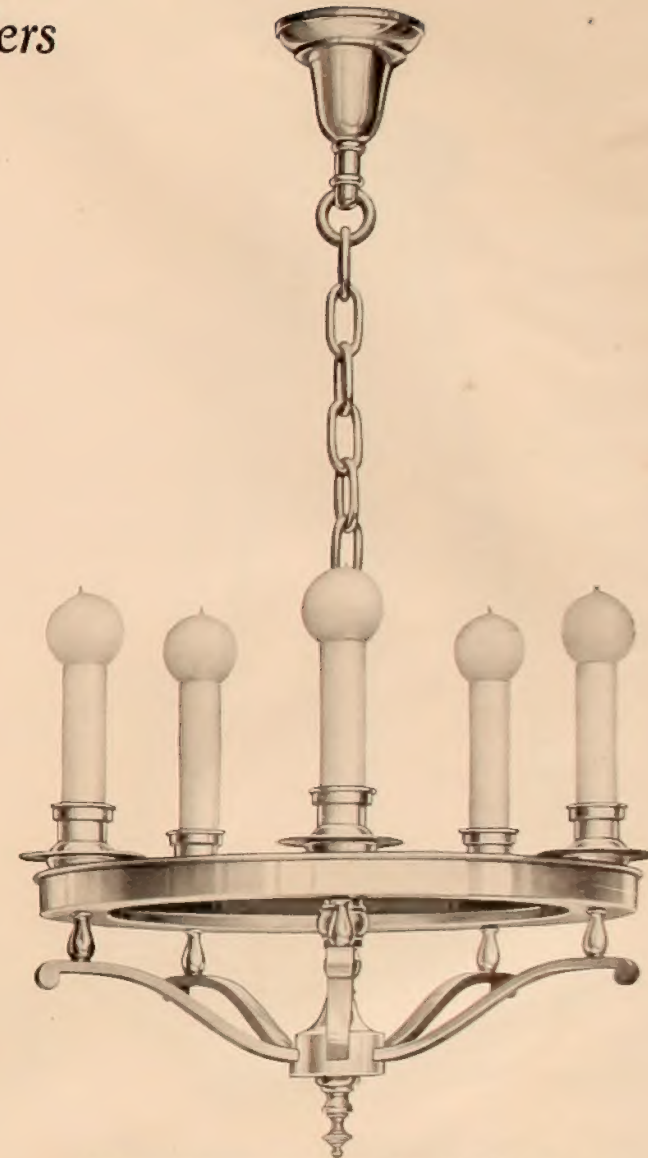

Adam Design Electric Candle Fixture

This artistic candle fixture in Adam design is made of genuine brass in brush (satin) brass and black finish. Length to bottom of fixture, 40 inches. Spread, 22 inches. Spun brass step canopy, 4½ inches in diameter, with fancy cast rosette at bottom. Cast loops and rings with short stem support an exquisite Adam design body measuring 7½ inches in diameter and 19 inches in length, including cast brass tassel. From the side of the body extend five gracefully curved hexagonal arms with fluted candle holders and candle plates to match body, and white enameled metal candles (1¼ inches in diameter). The candles are fitted with Edison base keyless sockets inside of candles and round 2½-inch frosted 16-candle power electric lamps.

Colonial Electric Candle Fixture

Made of genuine brass in brush (satin) brass finish. Length to bottom of fixture, 33 inches. Spread, 17 inches. Spun brass ceiling canopy, 5 inches in diameter, with short stem. Attached to this stem is a solid brass link chain supporting a beautiful Colonial spun brass body, 4½ inches in diameter and 12 inches in length including bottom ornament. From the lower part of the body extend four gracefully curved round arms with spun brass candle plates and candle holders and white enameled metal candles (1¼ inches in diameter). The candles are fitted with Edison base keyless sockets inside of candles and round 2½-inch frosted 16-candle power electric lamps.

Silver Plated Electric Candle Fixture

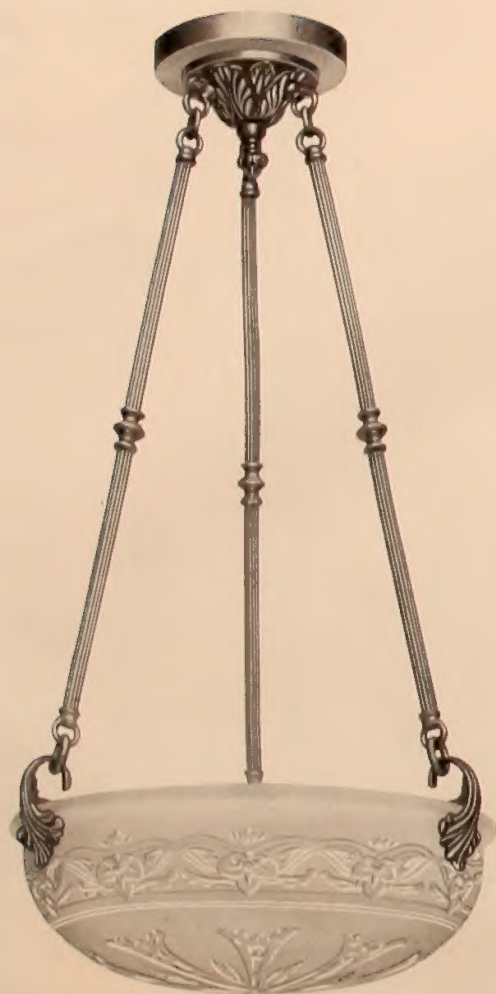

This most attractive Colonial fixture is made of genuine brass, silver plated. Length to bottom of fixture, 36 inches. Spread, 17½ inches. Spun ceiling canopy, 5 inches in diameter, from which extends a massive round link chain supporting a round turned body, from the bottom of which extend five flat tubing arms which support at their end an 18-inch open band. Upon this band are placed five lights fitted with candle plates, candle holders and white enameled metal candles (1¼ inches in diameter). The candles are equipped with Edison base keyless sockets inside of candles and round 2½-inch frosted 16-candle power electric lamps.

Semi-Indirect Electric Fixtures

Ionic Three-Light Fixture

Length to bottom of glass bowl, 32 inches. Diameter of bowl, 16 inches. The hanger is made of solid brass in brush (satin) brass and black finish. It has a spun brass ceiling canopy, 6½ inches in diameter, decorated with cast brass ornament in leaf design, and bottom knob. To the canopy are attached, on link connections, three ½-inch reeded brass rods with cast brass center ornaments and fancy cast leaf hook attachments. This hanger supports a beautifully shaped deep 16-inch light diffusing glass bowl, made in white satin finish closely resembling marble and is exquisitely deep etched on the bottom and side in a classic Ionic leaf and scroll design. Wired with silk cord run through the reeded rods to three keyless sockets inside of bowl.

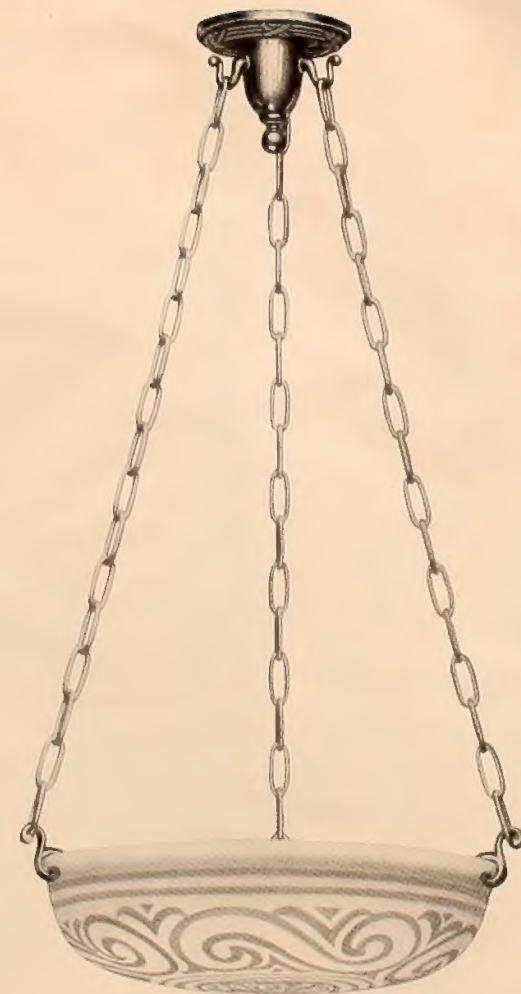

No. 34A5632 Price, complete as shown.....\$18.75

Grecian Key Six-Light Fixture

Length to bottom of glass bowl, 29 inches. Spread, 19 inches. The hanger is made of genuine brass in brush (satin) brass and black finish. It has a brass ceiling canopy, 6 inches in diameter, decorated with Grecian key border and cast knob. Four solid brass fancy link chains support a 16¼-inch brass band ornamented with Grecian key border. From the side of the band extend four cast candle arms fitted with 1¼-inch white enameled metal candles, Edison base keyless sockets inside candles, and round 2½-inch frosted 16-candle power electric lamps. Inside the band is fitted a 16-inch pebbled crystallized glass bowl decorated around the top with an amber green Grecian key border. Wired with silk cord laced through the chains to two electric lights with keyless sockets inside of bowl and the four candles.

No. 34A5550 Price, complete as shown.....\$16.98

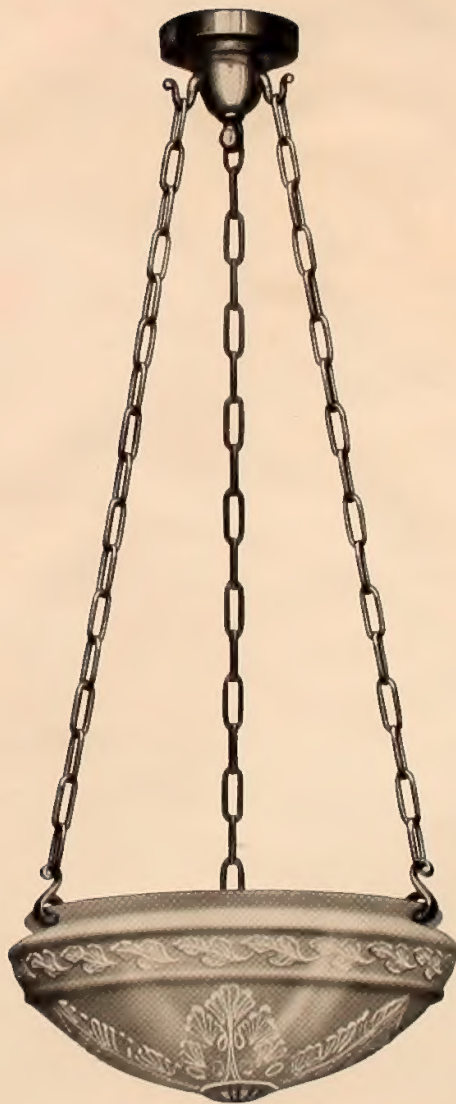

Egyptian Three-Light Fixture

Length to bottom of glass bowl, 33 inches. Diameter of bowl, 16 inches. The hanger is made of solid brass in brush (satin) brass finish. It has a ceiling canopy 5½-inches in diameter beautifully spun tapering center fitted with three cast hooks to which are attached three solid brass round link chains with cast bowl hooks. The 16-inch light radiating satin finish glass bowl, closely resembling Castilian marble, is beautifully decorated around the center in Egyptian scroll design and at the bottom in classic medallion effect. Wired with silk cord laced through the chains to three electric lights with keyless sockets inside of bowl.

Semi-Indirect Electric Fixtures

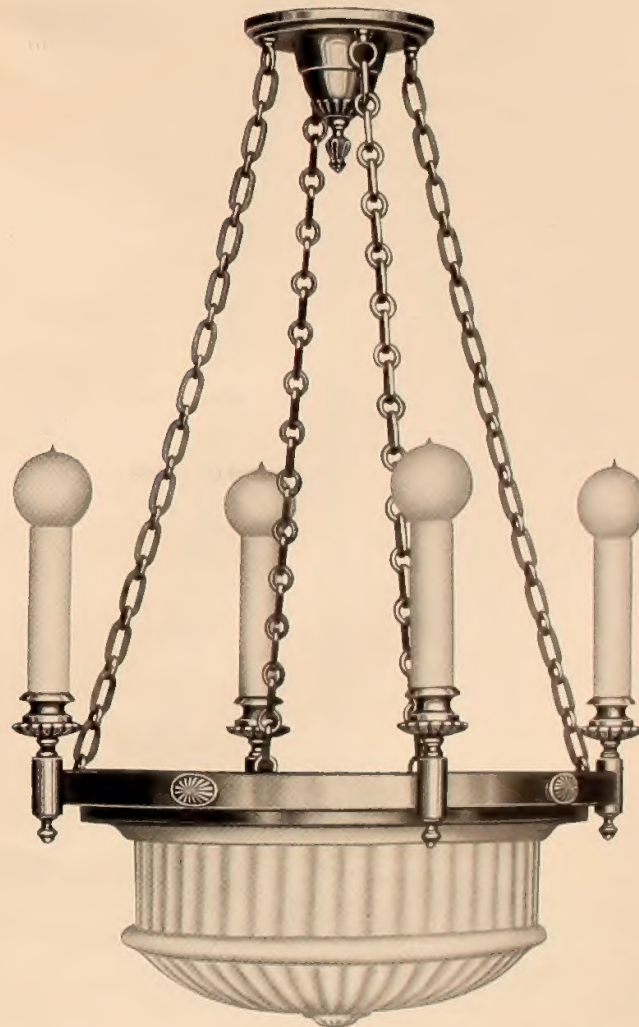

Oak Leaf Three-Light Fixture

Length to bottom of glass bowl, 36 inches. Diameter of bowl, 16 inches at widest part. The hanger is made of solid brass in brush (satin) brass finish. It has a plain round ceiling canopy, 4½ inches in diameter, with tapering center, fitted with three cast hooks and cast knob. To these hooks are attached three solid brass round link chains with cast brass bowl hooks. The 16-inch light radiating satin finish frosted glass bowl closely resembles alabaster in appearance and is richly embossed with oak leaf border and large oak leaves on the bottom. Wired with silk cord laced through the chains to three keyless sockets inside of bowl.

No. 34A5614

Price, complete as shown.....\$6.75

Silver Plated Six-Light Fixture

Length to bottom of glass bowl, 32 inches. Spread, 20 inches. The hanger is made of solid brass, *silver plated*. It has a spun ceiling canopy, 6 inches in diameter, terminating with a cast fluted ornament and knob. To this canopy are attached four fancy link chains supporting a band, 18 inches in diameter, ornamented with four cast medallions on the side. This band is fitted with a 16-inch fluted extra deep light diffusing satin finish glass bowl, which closely resembles Italian marble, in raised relief. Extending from the band are four round cast candle arms with cast knob at bottom and round fluted candle holders at top, which are fitted with 1½-inch white enameled metal candles, Edison base keyless sockets and round 2½-inch frosted 16-candle power electric lamps. The fixture is wired with silk cord laced through the chains to two keyless sockets inside of bowl and the four candle lights.

No. 34A5544 Price, complete as shown.....\$24.85

Pompeian Three-Light Fixture

Length to bottom of bowl, 36 inches. Diameter of bowl, 15 inches at widest part. Made of solid brass in brush (satin) brass and black finish. It has a round ceiling canopy, 7 inches in diameter, embossed to match bowl and fitted with three cast brass hooks. To these hooks are attached three solid brass round link chains with cast brass bowl hooks. The 15-inch light radiating satin finish glass bowl is handsomely embossed in paneled design with fluted border, and closely resembles Pompeian marble in appearance. Wired with silk cord, which is laced through the chain to three keyless sockets inside of bowl.

No. 34A5629

Price, complete as shown.....\$6.25

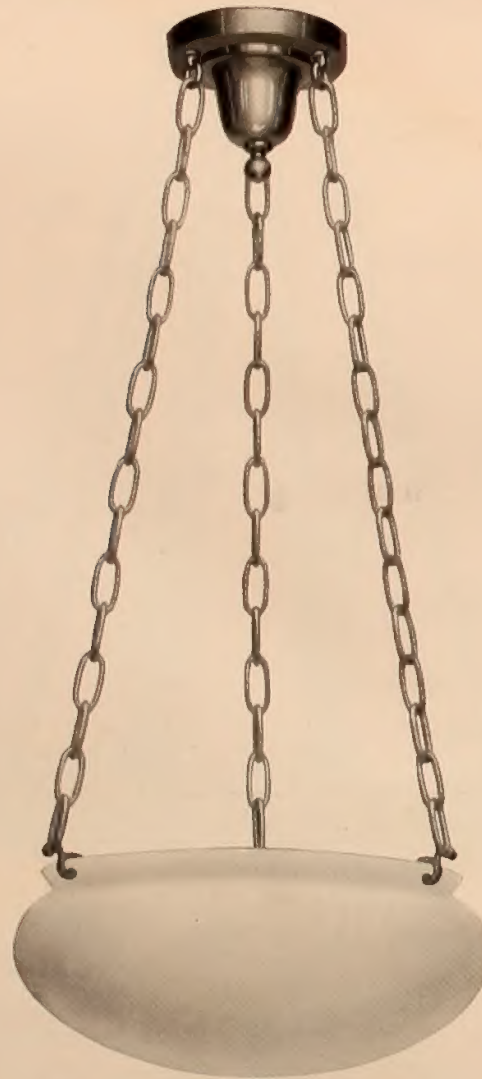

Semi-Indirect Electric Fixtures

Byzantine Four-Light Shower

Combining the direct with the semi-indirect lighting. Length to bottom of glassware, 36 inches. Spread, about 18 inches. The hanger is made of solid brass in brush (satin) brass and black finish with ceiling canopy, 6 inches in diameter, embossed around the edge in classical design and fitted with three hooks. To these hooks are attached three solid brass round link chains with combination bowl and light hooks supporting a 16-inch satin finish light radiating glass bowl and three drop lights. This bowl is richly embossed in paneled design with classic border closely resembling marble and is fitted with a keyless socket for one electric light inside of bowl. The three direct lights that hang around the edge of the bowl are on link chain connections and fitted with 2 1/4-inch embossed socket covers, key sockets and satin finish paneled glass shades to match bowl. This fixture is wired with silk cord laced through the chains.

No. 34A5638 Price, complete as shown.....\$9.45

Colonial Three-Light Fixture

Length to bottom of glass bowl, 36 inches. Diameter of bowl, 16 inches at widest part. The hanger is made of solid brass in brush (satin) brass finish. It has a spun brass ceiling canopy, 6 inches in diameter, fitted with three cast loops and cast brass knob. To these loops are attached three solid brass round link chains with bowl hooks supporting a 16-inch light radiating satin finish frosted glass bowl. This bowl is perfectly plain and closely resembles pure white Italian marble. The fixture is wired with silk cord laced through the chains to three keyless sockets inside of bowl.

Semi-Indirect Electric Fixtures

Adam Three-Light Fixture

Length to bottom of glass bowl, 33 inches. Diameter of bowl, 14 inches. The hanger, which is very rich, is made of solid brass in brush (satin) brass finish. It has a ceiling canopy, 8 inches in diameter, with heavy cast border chased in ornamental design, and solid brass ring. From the ring is suspended on round link chain connections a small cylindrical body decorated with a cast knob. Attached to the body are three curved flat tubing arms, supporting a 14-inch light radiating satin finish glass bowl on fancy link connections with three heavy cast bowl holders in leaf design. The bowl closely resembles pure white Castilian marble and is beautifully etched in Adam festoon design. Wired with silk cord run through the arms to three keyless sockets inside of bowl.

No. 34A5606 Price, complete as shown....\$24.75

Venetian Six-Light Shower

Length to bottom of glass, are, 36 inches. Spread, 19 inches. Made of composition, heavily metal coated (practically non breakable), in brush (satin) brass and black finish. It has a metallized canopy, 5½ inches in diameter, decorated in classic leaf design with short stem fitted with four cast brass hooks. To these hooks are attached four solid brass chains supporting a 17-inch metallized composition band in reeded and leaf design. Fitted in the frame is a 15-inch satin finish light diffusing bowl, closely resembling Italian marble, with raised fluted ornamental bottom. This bowl is fitted for two electric lights with keyless sockets. Where the chains join the band are handsome metallized leaf ornaments from which extend four cast brass hooks supporting four socket covers with key sockets and satin finish fluted glass shades to match bowl. The fixture is wired with silk cord laced through the chains.

No. 34A5818 Price, complete as shown \$27.75

Adam Two-Light Fixture

Length to bottom of glass bowl, 30 inches. Diameter of bowl, 14 inches. The rich and ornamental hanger is made of solid brass in brush (satin) brass finish. It has a beautiful cast brass ceiling canopy, 6 inches in diameter, beautifully chased in leaf design. To the canopy are attached three square link chains supporting a 15-inch cast brass ring, which is chased in classic design, fitted with a 14-inch light radiating satin finish glass bowl. This bowl is made of satin finish glass and is exquisitely etched in Adam design, consisting of medallions with French bowknots connected by festoons of laurel leaves. The fixture is wired with silk cord laced through the chains to two keyless sockets inside of bowl.

No. 34A5624 Price, complete as shown .. \$22.75

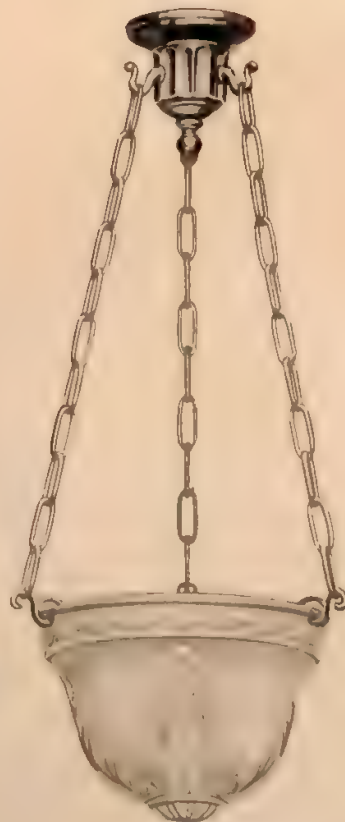

Semi-Indirect Electric Fixtures With Hand Painted, Frosted and Colored Bowls for Bedrooms, Halls, Dens and Small Living Rooms

**One - Light Semi - Indirect Fixture
With Hand Painted Bowl**

Length to bottom of glass bowl, 30 inches. Diameter of bowl, 12 inches. The hanger is made of solid brass in brush (satin) brass and black finish. It has a plain ceiling canopy, 5 1/4 inches in diameter, with short stem and spun body. From this body hang three solid brass round link chains supporting a 12 1/2-inch heavy metal ring richly chased in holly leaf and berry design. This band is fitted with a light diffusing satin finish frosted glass bowl, 12 inches in diameter. The bowl is charmingly hand painted on the inside with orchids in their dainty natural colors, giving a most attractive effect when the bowl is lighted. The fixture is wired with silk cord laced through the chains and keyless socket inside of bowl for one electric light.

No. 34A5612 Complete as shown. \$7.25

**One - Light Semi - Indirect Fixture
With Satin Finished Bowl**

Length to bottom of glass bowl, 24 inches. Diameter of bowl, 10 inches. The hanger is made of genuine brass in brush (satin) brass finish. It has a fluted brass canopy, 4 1/2 inches in diameter, with bottom knob and fitted with three cast hooks. To these hooks are attached three solid brass round link chains supporting a deep satin finish light radiating glass bowl, 10 inches in diameter. The bowl resembles white marble and is decorated with an embossed oak leaf border and large oak leaves on the side extending up from a rosette at bottom. The fixture is wired with silk cord laced through the chains and keyless socket inside of bowl for one electric light.

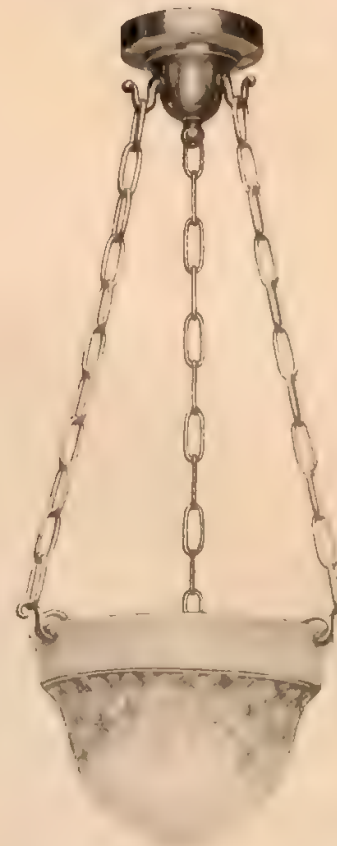

No. 34A5642 Complete as shown. \$4.98

**One - Light Semi - Indirect Fixture
With Crystal Striped Bowl**

Length to bottom of glassware, 22 1/4 inches. Diameter of bowl, 12 inches. The hanger is made of genuine brass in brush (satin) brass finish. It has a round ceiling canopy, 5 inches in diameter and 1/2-inch round stem with spun brass cup ornament. From this ornament extend three solid brass chains which support an 11 1/2-inch ring with 10-inch bottom opening for glass bowl. The fancy shaped pointed bottom bowl measures 12 inches in diameter at widest part and is made of frosted glass with clear crystal stripes in imitation of cut glass. The fixture is wired through the stem which extends into the bowl and is fitted with keyless socket for one electric light.

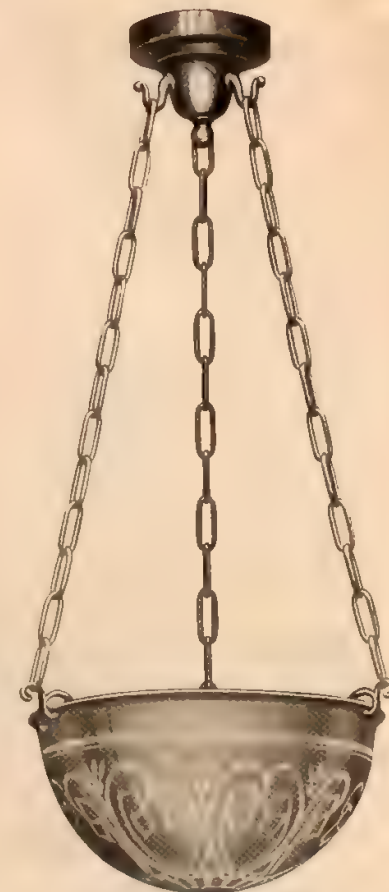

No. 34A5250 Complete as shown. \$5.75

**One - Light Semi - Indirect Fixture
With Hand Painted Bowl**

Length to bottom of glass bowl, 24 inches. Diameter of bowl, 10 inches. The hanger is made of genuine brass in brush (satin) brass finish. Spun brass ceiling canopy, 4 1/2 inches in diameter, fitted with three cast hooks. To these hooks are attached three solid brass round link chains supporting a deep light diffusing satin finish glass bowl, 10 inches in diameter. The bowl resembles white marble and is handsomely embossed with classic design border and conventional rosette at bottom. Below the embossed border is a hand painted decoration of pink and white apple blossoms with their green leaves. The fixture is wired with silk cord laced through the chains and keyless socket inside of bowl for one electric light.

No. 34A5643 Complete as shown. \$6.25

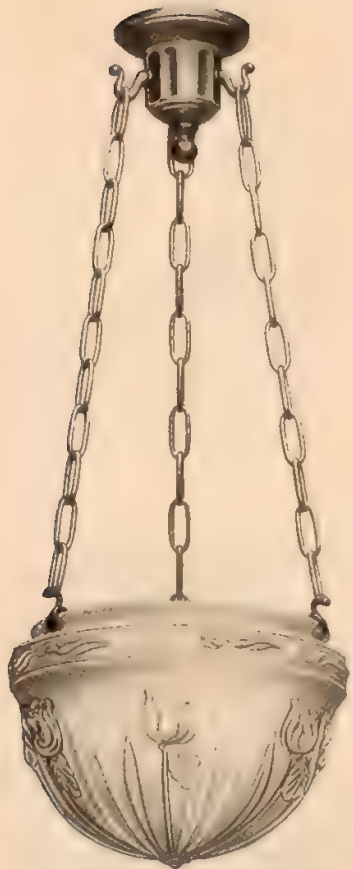

**One - Light Semi - Indirect Fixture
With Ivory Tinted Bowl**

Length to bottom of glass bowl, 28 inches. Diameter of bowl, 12 inches. The hanger is made of genuine brass in brush (satin) brass finish. It has a spun brass ceiling canopy 4 1/2 inches in diameter, fitted with three cast hooks. To these hooks are attached three solid brass round link chains supporting a 12-inch light radiating old ivory tinted glass bowl etched in a fancy scroll design in white. The coloring of this bowl is very pleasing and gives a mellow and soft amber tinted light that is very restful to the eyes. The fixture is wired with silk cord laced through the chains, and keyless socket inside of bowl for one electric light.

No. 34A5613 Complete as shown. \$5.98

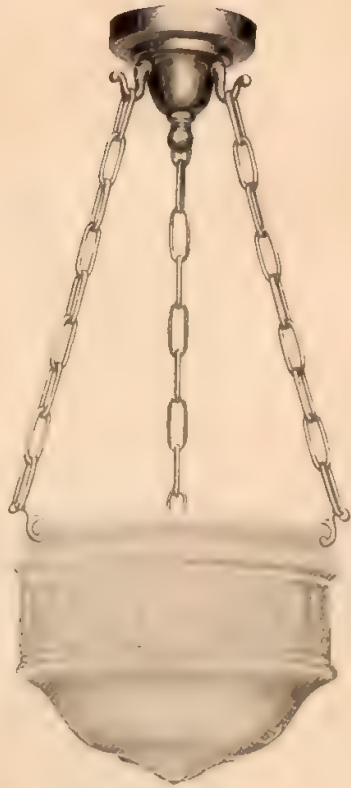

Semi-Indirect Electric Fixtures With Imitation Italian Marble Bowls for Bedrooms, Halls, Dens and Small Living Rooms

**One-Light Semi-Indirect Fixture
With Hand Tinted Bowl**

Length to bottom of glass bowl, 27½ inches. Diameter of bowl, 9½ inches at top and 11 inches at widest part. The hanger is made of genuine brass in brush (satin) brass finish. It has a stamped brass ceiling canopy, 4½ inches in diameter, in fluted design, fitted with three cast hooks to which are attached three solid brass round link chains, supporting an 11-inch marble finish light radiating glass bowl. This bowl is decorated in embossed tulip and leaf design and hand tinted with alternating pink and white lilies with green and white leaves. The fixture is wired with silk cord laced through the chain, and keyless socket inside of bowl for one electric light.

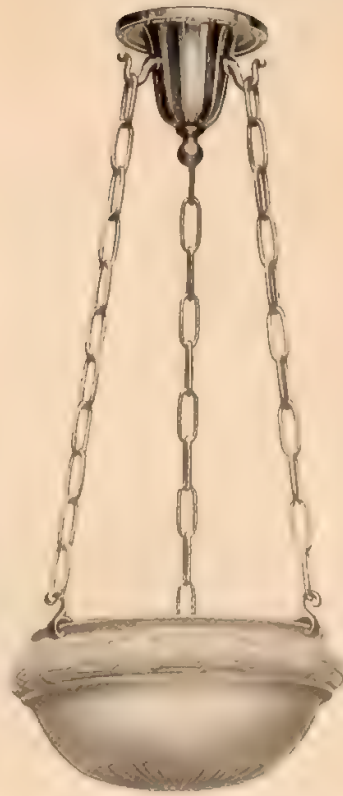

No. 34A5638 Price, complete as shown, \$5.98

**One-Light Semi-Indirect Fixture
With Deep Etched Bowl**

Length to bottom of glass bowl, 24 inches. Diameter of bowl, 10 inches at top and 11 inches at widest part. The hanger is made of genuine brass in brush (satin) brass finish. It has a spun brass ceiling canopy, 4½ inches in diameter, fitted with three cast brass hooks. To these hooks are attached three solid brass round link chains supporting an 11-inch light radiating extra deep bowl. This artistically shaped bowl is made of satin finish glass closely resembling pure white marble and is hand etched with a conventional laurel wreath border and a rosette design at bottom. The fixture is wired with silk cord laced through the chain, and keyless socket inside of bowl for one electric light.

No. 34A5628 Price, complete as shown, \$5.50

**One-Light Semi-Indirect Fixture
With Laurel Wreath Bowl**

Length to bottom of glass bowl, 24 inches. Diameter of bowl, 10 inches at top and 11¼ inches at widest part. The hanger is made of genuine brass in brush (satin) brass finish. It has a spun brass ribbed ceiling canopy, 5 inches in diameter, with bottom knob and fitted with three cast hooks. To these hooks are attached three solid brass round link chains supporting the light radiating satin finish frosted glass bowl 11¼ inches in diameter. The bowl is handsomely decorated around the top with an embossed laurel wreath border and a conventional rosette design at bottom. The fixture is wired with silk cord laced through chain, and keyless socket inside of bowl for one electric light.

No. 34A5641 Price, complete as shown, \$4.75

**One-Light Semi-Indirect Fixture
With Fancy Ribbed Bowl**

Length to bottom of glass bowl, 26 inches. Diameter of bowl, 9¾ inches at top and 11½ inches at widest part. The hanger is made of genuine brass in brush (satin) brass finish. It has a stamped brass ceiling canopy, 4½ inches in diameter, in fluted design, fitted with three cast hooks and cast brass bottom knob. To these hooks are attached three solid brass round link chains supporting an 11½-inch beautifully shaped marble finish glass bowl. This bowl is handsomely embossed in fluted design with deep ribs and extended fluted rosette at bottom. The fixture is wired with silk cord laced through the chain, and keyless socket inside of bowl for one electric light.

No. 34A5631 Price, complete as shown, \$4.98

**Three-Light Semi-Indirect Fixture
With Silver Plate Hanger**

Length to bottom of bowl, 29 inches. Diameter of bowl, 16 inches. The hanger is made of silver plate. It has a stamped silver center canopy, 5 inches in diameter, in fluted design, fitted with three cast hooks. To these hooks are attached three solid brass fancy link chains, with heavy cast medallion center ornaments and fancy cast ornamental attachments, supporting a 16-inch light diffusing satin finish glass bowl. This bowl is handsomely decorated in raised relief, closely resembling marble and is hand etched with a conventional laurel wreath border and a rosette design at bottom. The fixture is wired with silk cord laced through the chain, and keyless sockets inside of bowl for three electric lights.

Wicker and Semi-Indirect Electric Fixtures

Three-Light Glass Bottom Wicker Fixture

Length to bottom of fixture, 32 inches. Diameter of shade, 19 inches. This attractive semi indirect fixture is made of wicker in fumed oak finish. It has a large wicker ceiling canopy, 7 inches in diameter, to which are attached three fancy reed link chains with wicker ring attachments supporting a 19-inch wicker basket. This basket is fitted with a frosted glass bowl at the bottom and the wicker portion is lined with flowered cretonne in red rose and leaf pattern. The light coming through the cretonne produces a very pleasing effect in a living room or sun parlor. The fixture is wired with silk cord laced through the reed chains to three keyless sockets inside of bowl.

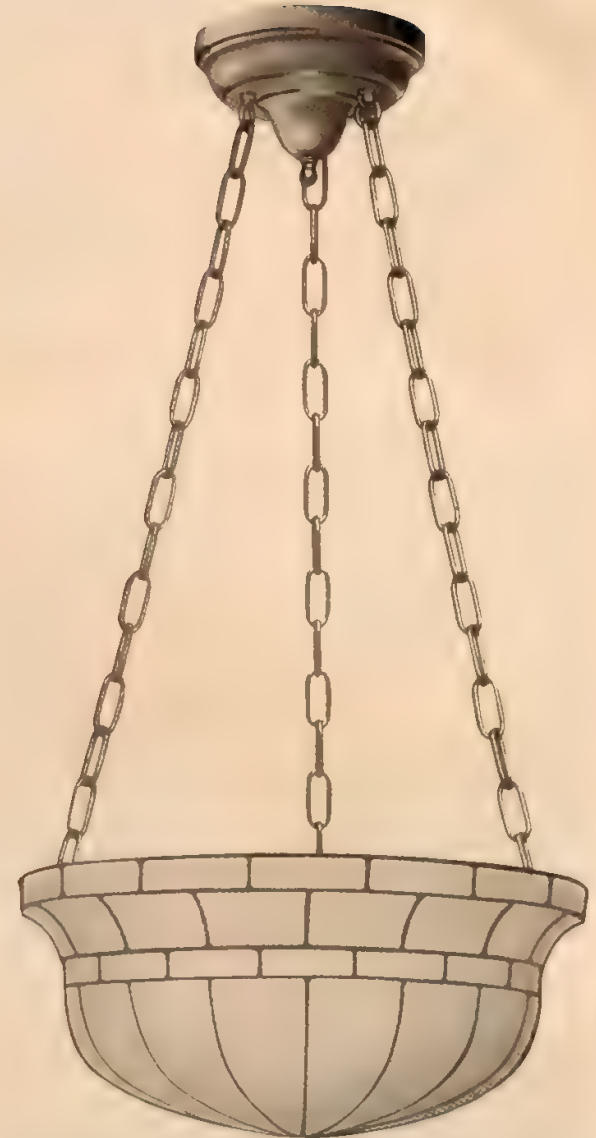

No. 34A5650 Price, complete as shown.....\$9.75

Two-Light Wicker Indirect Fixture

Length to bottom of fixture, 30 inches. Diameter of shade, 16 inches. This artistic indirect fixture is made of wicker in fumed oak finish. It has a large ceiling canopy, 7 inches in diameter, to which are attached three fancy reed link chains with fancy ring attachments supporting a 16-inch wicker basket with open lattice work around center lined with flowered cretonne in red and pink rose pattern. This fixture gives out a subdued light through the cretonne that is most pleasing in a summer home or enclosed porch. The fixture is wired with silk cord laced through the reed chains to two keyless sockets inside of bowl.

No. 34A5651 Price, complete as shown.....\$7.98

Three-Light Leaded Glass Semi-Indirect Fixture

Length to bottom of glass bowl, 34 inches. Diameter of bowl, 18 inches. The hanger is made of solid brass in brush (satin) brass finish. It has a round ceiling canopy, 7 1/2 inches in diameter. From the canopy hang three solid brass chains supporting an 18-inch light diffusing bowl. The bowl is made of ivory colored glass cut into square and rectangular pieces which are leaded together in a classical design. The leading is finished in gilt which with the ivory colored glass makes a very handsome fixture. The fixture is wired with silk cord laced through the chains to three keyless sockets.

No. 34A5259 Price, complete as shown.....\$14.50

Sculptured Composition Electric Showers

Three-Light Composition Shower

Length to bottom of glassware, 36 inches. Spread, 16 inches. This beautiful fixture is made of composition in Tiffany green or Roman gold finish. *State finish desired.* The bowl is 16 inches in diameter and richly sculptured in a very handsome leaf design with fancy ornamental ball at bottom. The composition material adapts itself splendidly to a design of this character, causing the relief work to stand out with a delicacy of outline that is both artistic and beautiful. This fixture has a 6-inch canopy in fancy design, to which are attached three solid brass chains supporting the composition bowl. From the bowl are suspended three cast husk socket covers in leaf design for electric lights on link chain connections. The wired fixture has silk cord laced through the chains, key sockets and 2 1/4-inch shade rings. The shades are hand molded of golden iridescent glass in an exceedingly artistic ribbed design with fluted bottoms.

Four-Light Composition Shower

Length to bottom of glassware, 30 inches. Spread, 16 inches. This handsome fixture is made of composition in a dignified massive design richly finished in Roman gold or Tiffany green. *State finish desired.* Very attractive in appearance, strong and durable. The composition material of which this shower is made gives it the heavy, massive appearance of cast metal without the enormous weight or extreme high cost of an elaborate metal casting. Although light in weight the composition is just as strong and durable as metal. The beautifully sculptured pan, 16 inches in diameter, fits directly against the ceiling and is decorated with laurel and ribbon border and fancy leaf center ornament. From the edge of the pan extend four solid brass link chains fitted with carved composition 2 1/4-inch keyless socket covers for electric lights. The wired fixture has silk cord laced through the chains, and keyless sockets. The shades are made of frosted glass in tulip shape with fluted bottoms.

Five-Light Composition Shower

Length to bottom of glassware, 36 inches. Spread, 18 inches. This elaborate fixture is made of composition in a dignified massive design richly finished in Roman gold or Tiffany green. *State finish desired.* The bowl is 16 inches in diameter and richly sculptured in a very handsome leaf design with fancy ornamental ball at bottom. The composition material adapts itself splendidly to a design of this character, causing the relief work to stand out with a delicacy of outline that is both artistic and beautiful. This fixture has a 6-inch canopy in fancy design, to which are attached five solid brass chains supporting the composition bowl. From the bowl are suspended five cast husk socket covers in leaf design for electric lights on link chain connections. The wired fixture has silk cord laced through the chains, key sockets and 2 1/4-inch shade rings. The shades are hand molded of golden iridescent glass in an exceedingly artistic ribbed design with fluted bottoms.

No. 34A6561. Street and Outdoor Farm Light.

This new and original light is the result of careful study by us to produce a thoroughly simple, practical and inexpensive outdoor light. The use of this light illuminates dark streets, dangerous roads and unsafe spots on your farm and will always assure you of a light driveway to barn, garage or gate. It will eliminate the necessity for an oil lantern when going into the barnyard, pasture, etc. This light can be erected inexpensively on wires strung between trees, posts or buildings. The light can be controlled by a switch either on the porch or inside the house, making operation simple and easy.

This street and outdoor farm light consists of a porcelain weatherproof suspension wireless socket with two lead wires which are to be connected to the main electric

Street and Outdoor Farm Light

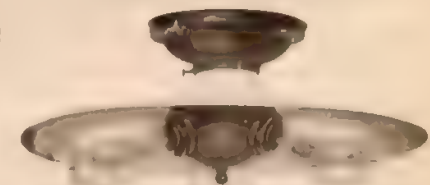

Shows No. 34A6561 erected with supporting wires attached and feed wires run through the insulators.

feed wires. Through a hole to the cap of the socket is run a galvanized wire rod with loops at each end to which the supporting wires from the tree, post, house, etc., are to be attached. This galvanized wire rod also supports two porcelain insulators through which the electric feed wires are strung and to which the two lead wires from the socket are to be attached. This light comes complete with 2 1/4 inch shade holder and 10 inch white enameled flat type steel reflector. Furnished with or without 40 watt clear tungsten lamp. For weatherproof feed wires, see page 90.

Porcelain Keyless Socket with pend and cap. Edison base. For drop cords.
No. 31A6524
Price, each 13c

Porcelain Key Socket with pend and cap. Edison base. For drop cords.
No. 31A6526
Price, each 15c

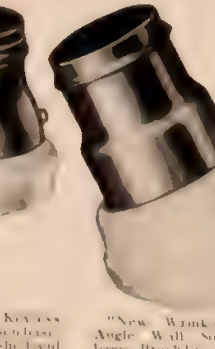

Porcelain Keyless Socket with 1/2 inch brass cap. Threaded Edison base. For fixtures.
No. 31A6528
Price, each 15c

Porcelain Key Socket with 3/4 inch brass cap. Threaded Edison base. For fixtures.
No. 31A6527
Price, each 18c

Porcelain Chain Pull Socket with insulated chain. 1/2 inch brass cap. Threaded Edison base. For fixtures. Excellent for bathrooms.
No. 31A6529
Price, each 33c

New Wrinkle Keyless Wall Socket, Edison base. Brush brass, satin brass, or polished brass finish. For 1/2 inch wall base. Holes for supporting screws spaced 1 1/2 inches on centers.
No. 31A6508
Price, each 20c

New Wrinkle Key Wall Socket, Edison base. Brush brass, satin brass, or polished brass finish. For 1/2 inch wall base. Holes for supporting screws spaced 1 1/2 inches on centers.
No. 31A6509
Price, each 21c

New Wrinkle Chain Pull Wall Socket, Edison base. Brush brass, satin brass, or polished brass finish. For 1/2 inch wall base. Holes for supporting screws spaced 1 1/2 inches on centers.
No. 31A6510
Price, each 35c

New Wrinkle Keyless Wall Socket, Edison base. Brush brass, satin brass, or polished brass finish. For 1/2 inch wall base. Holes for supporting screws spaced 1 1/2 inches on centers.
No. 31A6509
Price, each 12c

New Wrinkle Keyless Wall Socket, Edison base. Brush brass, satin brass, or polished brass finish. For 1/2 inch wall base. Holes for supporting screws spaced 1 1/2 inches on centers.
No. 31A6511
Price, each 25c

New Wrinkle Keyless Wall Socket, Edison base. Brush brass, satin brass, or polished brass finish. For 1/2 inch wall base. Holes for supporting screws spaced 1 1/2 inches on centers.
No. 31A6512
Price, each 28c

New Wrinkle Keyless Wall Socket, Edison base. Brush brass, satin brass, or polished brass finish. For 1/2 inch wall base. Holes for supporting screws spaced 1 1/2 inches on centers.
No. 31A6516
Price, each 38c

New Wrinkle Chain Pull Wall Socket, Edison base. Brush brass, satin brass, or polished brass finish. For 1/2 inch wall base. Holes for supporting screws spaced 1 1/2 inches on centers.
No. 31A6516
Price, each 38c

New Wrinkle Keyless Wall or Ceiling Socket, Edison base. Brass ceiling base with insulated porcelain bottom. Brush brass, satin brass, or polished brass finish. Outside diameter of porcelain base, 4 1/4 inches. Holes for supporting screws are spaced 1 1/2 inches on centers.
No. 31A6520
Price, each 27c

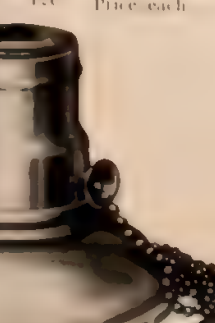

New Wrinkle Key Wall or Ceiling Socket, Edison base. Brass ceiling base with insulated porcelain bottom. Brush brass, satin brass, or polished brass finish. Outside diameter of porcelain base, 4 1/4 inches. Holes for supporting screws are spaced 1 1/2 inches on centers.
No. 31A6518
Price, each 28c

New Wrinkle Chain Pull Wall or Ceiling Socket, Edison base. Brass ceiling base with insulated porcelain bottom. Brush brass, satin brass, or polished brass finish. Outside diameter of porcelain base, 4 1/4 inches. Holes for supporting screws are spaced 1 1/2 inches on centers.
No. 31A6522
Price, each 43c

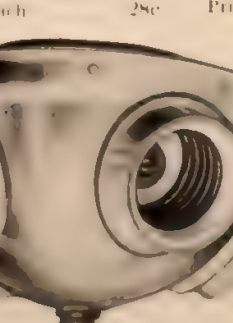

New Wrinkle Chain Pull Wall or Ceiling Socket, Edison base. Brass ceiling base with insulated porcelain bottom. Brush brass, satin brass, or polished brass finish. Outside diameter of porcelain base, 4 1/4 inches. Holes for supporting screws are spaced 1 1/2 inches on centers.
No. 31A6522
Price, each 43c

New Wrinkle Chain Pull Wall or Ceiling Socket, Edison base. Brass ceiling base with insulated porcelain bottom. Brush brass, satin brass, or polished brass finish. Outside diameter of porcelain base, 4 1/4 inches. Holes for supporting screws are spaced 1 1/2 inches on centers.

Benjamin Aluminum Weatherproof Keyless Socket. Edison base. 2 inch cap. This socket is recommended for all fixtures used on outside work. Absolutely weather and water proof.
No. 31A6525
Price, each 49c

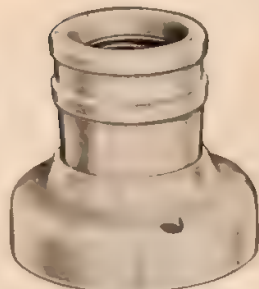

Benjamin Aluminum Weatherproof Keyless Socket. Edison base. 2 inch cap. This socket is recommended for all fixtures used on outside work. Absolutely weather and water proof.
No. 31A6525
Price, each 49c

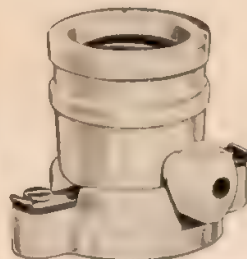

Porcelain Key and Keyless Sockets, Current Taps, Etc.

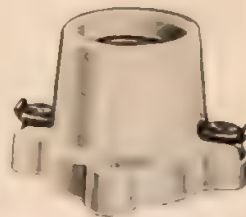

Porcelain Wall or Ceiling Key Socket for concealed wiring. Edison base. Holes for supporting screws are spaced 2 1/2 inches on centers. Recess in base 1/2 inch deep, 2 inches wide. No. 34A6536 Price, each 18c

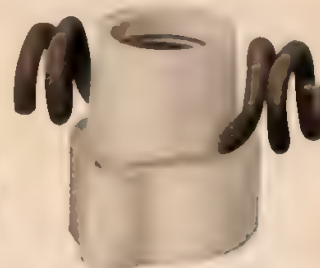

Porcelain Wall or Ceiling Keyless Socket for concealed wiring. Edison base. Holes for supporting screws are spaced 2 1/2 inches on centers. Recess in base 1/2 inch deep, 2 inches wide. No. 34A6535 Price, each 15c

Porcelain Key Current Socket with open terminals for concealed wiring. Edison base. Holes for supporting screws are spaced 1 inch on centers. No. 34A6538 Price, each 17c

Porcelain Keyless Cleat Receptacle with open terminals for clear wiring. Edison base. Holes for supporting screws are spaced 1 1/2 inches on centers. No. 34A6537 Price, each 7c In lots of 250, each 6 1/4c

Porcelain Keyless Weatherproof Receptacle. Edison base. Fitted with 6 inches of No. 14 rubber covered wire. Holes for supporting screws are spaced 1 1/2 inches on centers. No. 34A6539 Price, each 15c

Porcelain Keyless Receptacle for use with wood molding. Edison base. Holes for supporting screws are spaced 1 1/2 inches on centers. No. 34A6761 Price, each 12c

Porcelain Wall or Ceiling Key Socket for use in wiring with wood molding. Edison base. Holes for supporting screws are spaced 2 inches on centers. No. 34A6765 Price, each 17c

Porcelain Keyless Cleat Receptacle with concealed terminals for clear wiring. Edison base. Holes for supporting screws are spaced 1 1/2 inches on center. Carries wires 1/2 inch from the surface. No. 34A6540 Price, each 12c

Weatherproof Mica Composition Keyless Socket. Edison base. Fitted with 6 inches of No. 14 rubber covered wire. To be attached direct to the feed wire as a temporary socket for outdoor or decorative purposes or in damp places. No. 34A6544 Price, each 9c

Weatherproof Porcelain Keyless Socket. Edison base. Fitted with 6 inches of No. 14 rubber covered wire. To be attached direct to feed wires for outdoor purposes and in damp places. No. 34A6545 Price, each 7c

Brass Pendant Switch. Made of brass in brushed satin finish. Used for turning on and off electric lights on fixtures not controlled by switch and out of reach from the floor. Can be attached to any fixture having a bottom knob or extended to any length by cord from center of fixture. No. 34A6547 Price, each 30c

Porcelain Pendant Switch. Made of porcelain in embossed design, tinted a gray color. Used for turning on and off electric lights or fixtures not controlled by wall switch and hung out of reach from the floor. Can be extended to any length by cord. No. 34A6743 Price, each 30c

Chain Pull Make and Break Brass Pull Switch. A very handy article for all fixtures installed in a home without a wall switch. Can be attached to the bottom of a fixture having a bottom knob or extended to any length desired by a cord from the center of the fixture. One pull of the chain turns on the light and another pull extinguishes it. Brush brass finish, with 8 inches of chain. No. 34A6549 Price, each 45c

Dim a Lite Chain Pull Socket. For use on any standard Edison base socket. Easily attached. Can be used with any lamp ranging from 25 to 40 watts. The pull is to enable you to have any degree of light desired from full brilliancy to a glow without a dimmer. Regulated by the chain. Useful in nurseries, bathrooms, etc. No. 34A6655 Price, each 87c

Plug Clusters. Porcelain body with a genuine brass body shell in brush brass or polished brass finish. State finish desired. To be used for increasing the number of lights or to operate an electric fan and have a light at the same time. Fits any standard Edison base socket. No. 34A6552 Price, each 55c No. 34A6553 Price, each 75c

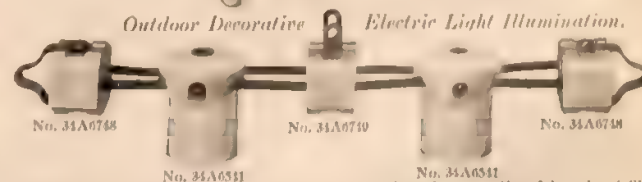

Twin Chain Pull Socket. Made of brush brass (satin brass) finish. Edison plug base. Fits any standard Edison base socket. First pull connects one socket, second pull connects both sockets, third pull disconnects one socket, fourth pull disconnects both sockets. 8-inch chain. No. 34A6558 Price, each 68c

Brass Current Tap With Rotating Sleeves. This is used where light is desired and also where a connection is to be made for an electric fan, chandelier, percolator, lamp or any other electrical device. It has a rotating sleeve, whereby it may be attached in any desired position without twisting the lamp cord. No. 34A6753 Price, each 35c

Porcelain Current Tap With Detachable Plug. For safely carrying current from an electric fixture to fans, motors, lamp and any electrical device without eliminating the original light. Edison base and snap porcelain attachment plug. No. 34A6752 Price, each 26c

Adapted for decorative work or general lighting, such as lawn parties, fairs, street illumination, etc., or where outside lighting is required for a short time. Illustration is one-fourth actual size. This illumination can be extended to any length and number of lights by the addition of sockets, cleats and wire. We recommend a rubber covered stranded wire on this outfit. Porcelain Suspension Socket. The binding screws on the side have pointed ends which puncture the insulation on the wire and make contact with the copper wire. No. 34A6551 Price, each 12c Porcelain End Suspension Cleat. To be used at each end of row of lights to be changed from posts, buildings, etc. Double slotted, which allows hooks to be changed in either direction. No. 34A6748 Price, each 4c Porcelain Center Suspension Cleat. For supporting wires at intervals in the row of lights. Double slotted, which allows hooks to be changed so as to hang from either direction. No. 34A6749 Price, each 4c Rubber Covered Stranded New Code Wire No. 34A6690 12-gauge. Price, per foot 1 3/4c No. 34A6691 14-gauge. Price, per foot 1 1/4c

Porcelain Rosettes and Sundries—House and Fixture Wire

Porcelain Concealed Wiring Rosette

This rosette is fuseless with concealed terminals and removable cap which snaps in place by a slight turn. For drop cords on concealed wiring. Holes for screws spaced 1 3/4 inches on center.

No. 34A6740 Price 9c

Porcelain Self Tying Ceiling Button

Used with drop cord cleat and knob open wiring. Can be nailed to ceiling and drop cord easily attached to the feed wires. Holes for screws are spaced 1 3/4 inches on centers.

No. 34A6771 Price, each, 5c Per dozen .53c

Porcelain Separable Molding Rosette

This rosette is fuseless, with movable cap. To be used for drop cord installations in conjunction with wood molding. Holes for screws spaced 1 3/4 inches on center.

No. 34A6850 Price .8c

One-Piece Fuseless Porcelain Cleat Rosette

Carries wire 1/2 inch from the surface wired over. Can be used on concealed work also, as holes for bringing the wires up through have been provided in the rosette. Holes for molding screws have been spaced 1 3/4 inches on centers.

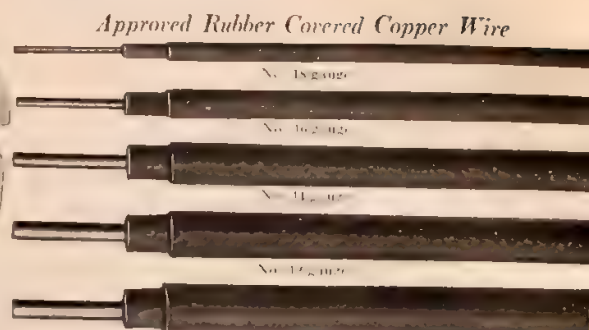

No. 34A6741 Price .5c

Porcelain Cleat Rosette With Enclosed Terminals

Holes for supporting screws are spaced 1 3/4 inches on centers. Adapted to all open wiring where drop cord is to be used.

No. 34A6772 Price 9c

Approved Rubber Covered Copper Wire

The illustrations above show actual size of the wire.

Single Braid House Wire

For open (knob and tube), and molding wiring.	
No. 34A6781 10-gauge.	Price, per foot .001 1/2

Indicating Key Snap Switch, 5 amperes, 110 volts. The key for turning this switch is on the side and out of the way, therefore not easily broken off. At one end of the key is a pointed indicator which, when turned toward the wall, indicates that the electric current is turned off, and when pointing forward that the current is turned on.

No. 34A6548 Price, each 16c

Turn Button Switch. Single pole, 5 amperes. Polished nickel finish. Holes for supporting screws are spaced 1 1/2 inches on centers.

No. 34A6736 Price, each, 14c

Same as No. 34A6736, but three-way.

No. 34A6735 Price, each, 22c

Same as No. 34A6736, but indicating "Off" and "On"

No. 34A6737 Price, each, 15c

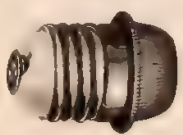

Edison Baseboard Plug Receptacle. Complete for attaching electric portable lamp, iron toaster, etc. When not in use the lid is closed, making the plate flush with the baseboard or wall. Brush brass finish.

No. 34A6739 Price, each, 35c. In lots of 10 \$3.20

Chapman Baseboard Plug Receptacle. Complete for attaching electric portable lamp, iron toaster, etc. The lid for inserting the plug is on top of the cord so that the plate is at all times flush with the baseboard or wall.

No. 34A6738 Price, each, 54c

Attachment Plug with Edison Screw Base, having a rotating sleeve which makes it possible to attach the plug quickly without twisting the cord.

No. 34A6556 Price, each, 17c

Separable Attachment Plug with Edison Screw Base. Porcelain body and cap. The cap is detachable from the body of the plug by simply pulling apart, making a quick make and break connection.

No. 34A6554 Price, each, 13c

Separable Attachment Plug. Made with composition cap and porcelain base. Will carry 60 watts Edison screw base. A convenient article for connecting portable lamp, electric iron and all other electrical devices.

No. 34A6555 Price, each, 15c

Copper Terminal Fuse Links to be used with No. 34A6722 and No. 34A6724 switches. Carried in sizes of 10, 20 and 30 amperes. State size wanted.

No. 34A6650 Price, each, 15c

Single Branch, Two-Wire, 10-Ampere, 125-Volt Panel Switch. Made of porcelain. For Edison base fuses. Fitted with one indicating snap switch.

No. 34A6675 Price, each, 98c

Double Branch, Two-Wire, 10-Ampere, 125-Volt Panel Switch. Made of porcelain. For Edison base fuses. Fitted with two indicating snap switches.

No. 34A6679 Price, each, \$1.35

Double Branch, Two-Wire, 30-Ampere, 125-Volt Plug Cut-Out Block. Made of porcelain. For Edison base fuses.

No. 34A6729 Price, each, 24c

Double Branch, Three-Wire, 30-Ampere, 125-Volt Plug Cut-Out Block. Made of porcelain. For Edison base fuses.

No. 34A6728 Price, each, 26c

Single Branch, Two-Wire, 30-Ampere, 125-Volt Plug Cut-Out Block. Made of porcelain. For Edison base fuses.

No. 34A6727 Price, each, 14c

N.E. Code Cartridge Fuse. To be used with switches Nos. 34A6722 and 34A6728. Sizes, 10, 20 and 30 amperes. State size desired.

No. 34A6615 Price, each, 9c

Edison Base Plug Fuse. From 6 to 30 amperes. Mention amperage desired.

No. 34A6614 Price, each, 3c

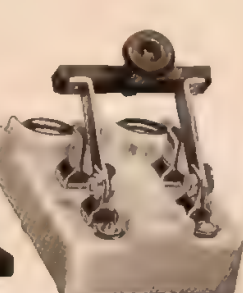

Thirty-Ampere, 250-Volt, Slate Base Two-Wire Main Line Switch and Cut Out. For cartridge fuses. Type C.

No. 34A6722 Price, each, 40c

Thirty-Ampere, 250-Volt, Slate Base Three-Wire Main Line Switch and Cut Out. For link fuses.

No. 34A6724 Price, each, 78c

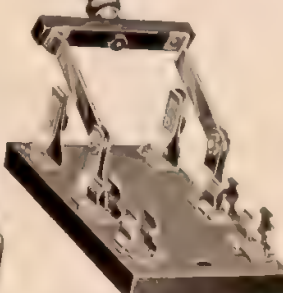

Twenty-Five-Ampere, 125-Volt, Porcelain Combination Two-Wire Main Line or Entrance Switch and Cut Out. For plug fuses.

No. 34A6725 Price, each, 37c

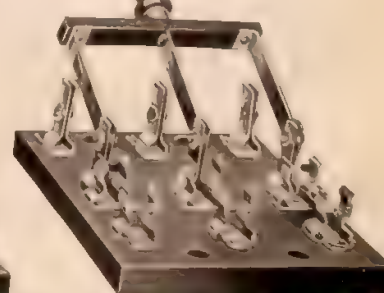

Thirty-Ampere, 125-Volt, Porcelain Combination Three-Wire Main Line Switch and Cut Out. For plug fuses.

No. 34A6726 Price, each, 55c

Thirty-Ampere, 250-Volt, Slate Base Two-Wire Main Line Switch and Cut Out. For cartridge fuses. Type C.

No. 34A6778 Price, each, 43c

Thirty-Ampere, 250-Volt, Slate Base Three-Wire Main Line Switch and Cut Out. For cut-out fuses. Type C.

Single Wall Case or Switch Box

AA Union. To be used with all switches and baseboard receptacles with knockouts for flexible loom. This box is 3 inches deep and fits any switch. Black enamel finish.

No. 34A6590

Price, each.....14c

BB Union. Same box as above, but with knockouts for ½-inch rigid conduit instead of loom.

No. 34A6658

Price, each.....15c

AA Union Spacer

To be used with AA box for two or more switches. To use, remove a side of single box and insert spacer spacers as you desire. Switches in 2 or 4 sides removed from case for the opposite side. Black enamel finish.

No. 34A6591

Price, each.....14c

Same as above but to be used with BB box for ½-inch conduit.

No. 34A6659

Price, each.....14c

Square Single Switch Cover

AE, ¾. For holding one switch. To be used with box No. 34A6589. Black enamel finish.

No. 34A6592

Price, each.....10c

Square Picture Outlet Cover

AC Raised open cover for fixtures. To be used with box No. 34A6589. Black enamel finish.

No. 34A6587

Price, each.....7c

Two-Gang Switch Cover

AG, ¾, 4 inches square and ¾-inch deep, black enamel finish. To be used with No. 34A6589 Outlet Box for holding two switches.

No. 34A6588

Price, each.....10c

Outlet Box for Junction Switch or Fixture

A, 1½, 4 inches square, 1½ inches deep, with five knockouts in bottom and two on each side for ½-inch conduit and two for ½-inch gas pipe. Black enamel finish.

No. 34A6589

Price, each.....14c

Cut-Out and Switch Box

Made of sheet steel, heavily japanned in black finish. Knockouts in side for ½-inch conduit or BX armored cable. Approved and required by board of fire underwriters to enclose all cut-outs and switches.

No. 34A6565 Size, 8x12x3 inches. Price, each.....75c

No. 34A6566 Size, 10x18x3 inches. Price, each.....\$1.10

Round Raised Closed Cover

BB 4 inches in diameter with ¾-inch raised crown for closing outlet box in ceiling. To be used with No. 34A6604 Round Outlet Box. Black enamel finish.

No. 34A6605 Price, each....7c

CB ¾-inch. Same as No. 34A6605 above, but ¾-inch. To be used with No. 34A6593 box.

No. 34A6594 Price, each....5c

Type A Condulets

No. 34A6601 With two wire hole porcelain plate. For ½-inch conduit.

Price, each.....20c

No. 34A6602 With two wire hole porcelain plate. For ¾-inch conduit.

Price, each.....35c

Books on Wiring and Illumination

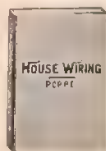

Modern Illumination
Theory and Practice

A handbook of practical information for users of electric light, architects, contractors and electricians, by Henry C. Horstmann and Victor H. Tousley. The last word in electrical science and electrical construction. Know what the best lighting systems

how they should be installed, and at kinds of lights are most effective. This book the nature and properties light are briefly yet clearly explained. Photometry and illumination calculations are explained in a practical manner. Different types of lamps are described with reference to construction, use, advantages and objections. Reflectors, fixtures, location lamps and indirect lighting are intelligently treated. One chapter of useful directions for drawing up plans and specifications. Just published. Pocket size, 273 pages, with technical tables, illustrations and diagrams. Bound in morocco leather, stamped with gold. Size, $4\frac{1}{4} \times 6\frac{3}{4}$ inches. Weight, 1 $\frac{1}{2}$ pounds.

No. 34A4784 Price.....\$1.48

House Wiring

Describing and illustrating up to date methods of installing electric light wiring. Intended for the electrician, helper and apprentice. Contains just the information needed for successful wiring of a building. Fully illustrated with diagrams and plans. 103 pages. Bound in stiff linen covers. Shipping weight, 8 ounces.

No. 34A4411 Price..... 35c

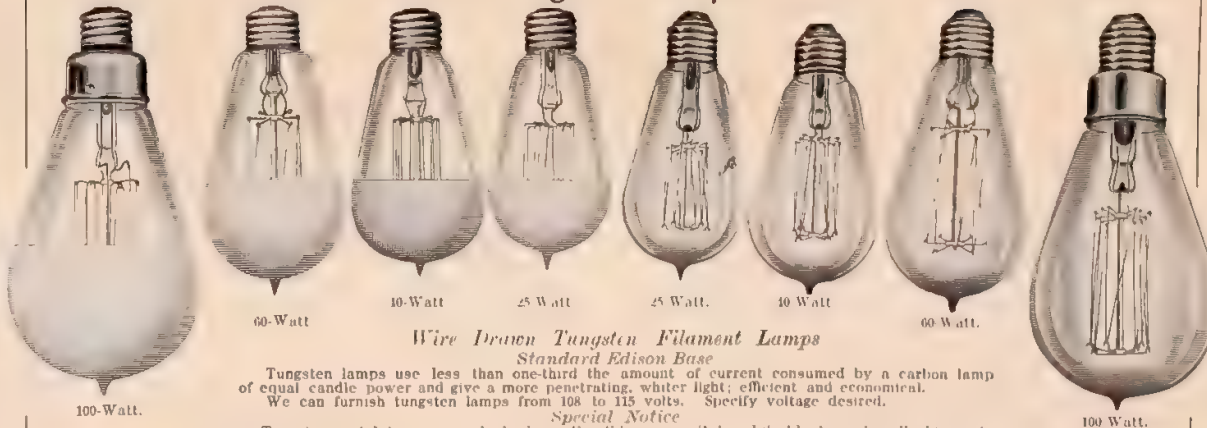

Wiring a House

By Herbert Pratt. Tells just how to plan; where to begin; what wire to use; how to run it according to insurance rules, etc. Paper covers, 21 pages. Size, $5\frac{1}{2} \times 8$ inches. Shipping weight, 4 ounces.

No. 34A4405 Guide to Electric Lighting. Price, each.....80c

Tungsten Lamps

Wire Drawn Tungsten Filament Lamps

Standard Edison Base

Tungsten lamps use less than one-third the amount of current consumed by a carbon lamp of equal candle power and give a more penetrating, whiter light; efficient and economical. We can furnish tungsten lamps from 10 to 115 volts. Specify voltage desired.

Special Notice

Tungsten metal is very easily broken. For this reason it is advisable to make all shipments by freight or express. We cannot guarantee safe delivery by parcel post.

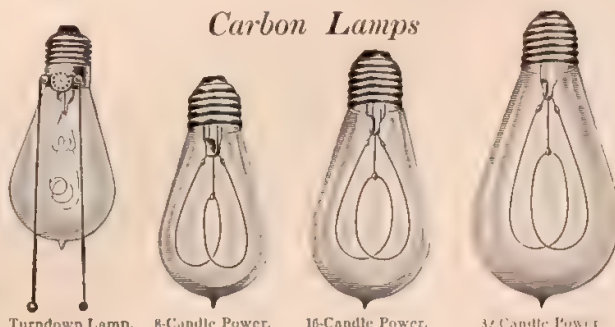

Frosted Bottom Tungsten Lamps

Price, per half dozen \$1.15

Black Diamond Cap Mantle Mounted on metal cap and magnesia coated wire. Special heavy weave.
No. 34A2450
Price, per half dozen 98c

Acetylene Gas Burners

Our various styles of acetylene burners embody the latest improvements in acetylene lighting. They consist of a nickel plated heavy brass pillar fitted with an imported one-piece (no composition) German stone lava tip. We list these tips in three sizes, which consume respectively, 1/2, 3/4, and 1 foot of acetylene gas an hour. 1/2-foot tip gives 24-candle power light, 3/4-foot tip gives 36-candle power light and 1-foot tip gives 48-candle power light.

Imperial

This is the best inexpensive burner made. We are selling it at the price of the cheap composition tip burners which cost less than one-half to manufacture.

No. 34A69300 1/2-Foot Burner.
Price, each 9c
Per half dozen 50c

No. 34A69370 1-Foot Burner.
Price, each 9c
Per half dozen 50c

Vesta Turndown Burner

Practical—Safe—Economical.

The little pilot light in the center is not a blue (Bunsen) flame, but burns with a bright white flame, and consumes only 1-16 foot of gas an hour. This burner gives as much light as the best burner made, because it is not handicapped by an air mixing second chamber which, of necessity, reduces the luminosity of all other turndown burners; 4-inch chains.

No. 34A69500 1/2-Foot Burner. Price, each 60.47
Per half dozen 2.89

No. 34A69510 3/4-Foot Burner. Price, each 60.47
